Skills

- ☐ Frontend development[react, tailwind css, html, css,]
- ☐ Backend [nodejs]
- ☐ Data analysis using power bi
- ☐ Familiarity with docker and linux
- ☐ Object oriented [java, python,c++]
- ☐ Following software development lifecycle path
- ☐ Networking and basic security
- ☐ Database[mongodb, sql, supabase, postgresql]
- ☐ Automation[n8n, ai tools]

Experience

- AASTU / Plan and report management system July 2024-September 2025 I have worked on this project at Addis Ababa science and technology university as a summer internship program. The framework I used is Laravel as a backend and react for frontend.
- AASTU / Automated code review e-learning system June 2025 Built a system to provide automated feedback on student code submissions using machine learning techniques. Developed backend services for code analysis, grading, and user management. Integrated NLP and static code analysis tools to assess code quality and style.
- AASTU / Arduino based smart cleaning robot November 2024 IETP program at AASTU. Designed and programmed an autonomous cleaning robot using Arduino microcontrollers, sensors
- Currently working at Moti engineering as a software engineer

Education

Addis Ababa science and technology university / Degree

November 2021-June 2025, Addis Ababa

Recent Software Engineering graduate with a cgpa 3.32 and exit exam 73% at Addis Ababa science and technology university(AASTU).

Awards

-
- 2024 summer digital innovation bootcamp AI and machine learning and K-eGov open source framework in Ethiopia as a part of Handong UNESCO UNITWIN projects with Addis Ababa science and technology.
 - HCIA-data com course completed
